**ITALIA**  
Portable Milking Machine

by  
**InterPuls®**

portable  
milking  
is  
evolving!

InterPuls launches a new concept of “entry level”. The sinuous shape, the ergonomic design, the innovative and recyclable materials together with an advanced production technology make the *ITALIA* portable system a new landmark that only the “Milking component specialist” could mark.

*170ITALIA* & *220ITALIA* grant sturdiness and reliability in every condition, ergonomics in order to answer to the farmer’s need and a sophisticated design to distinguish themselves!

***ITALIA*** range is perfect  
as entry-level milking system,  
such as a solution  
to milk treated or invalid cows  
in the modern business farms.

unique  
in  
everything!

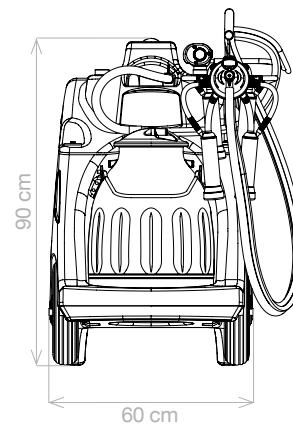

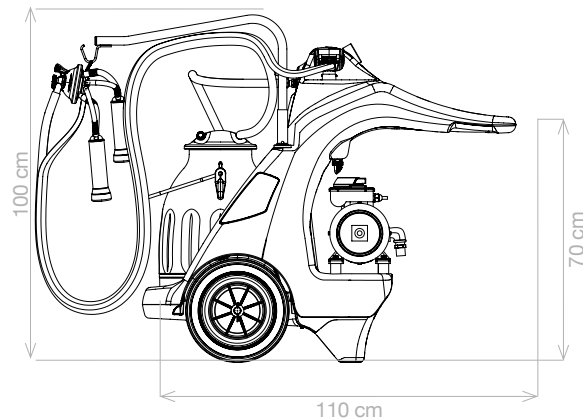

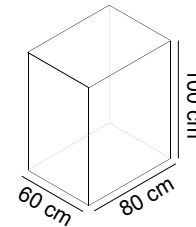

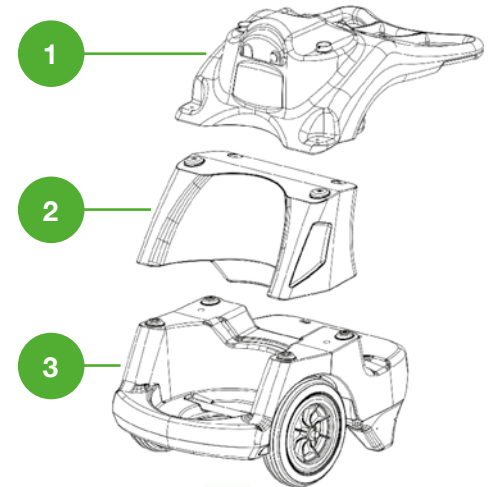

$$\downarrow \text{CO}_2 + \text{recycling symbol} + \text{tree icon} = \text{leaf icon}$$

**ITALIA** has been engineered to optimize transports too, knocking down costs and CO<sub>2</sub> emissions.

	Ref.	Note
	3100079	Bucket check valve

The Check Valve permits to prevent accidental infiltration of milk into vacuum tank and vacuum pump.  
The design of the floater ensures a prompt intervention even in presence of foam
